ROUND 4.5 AFROBAROMETER SURVEY IN UGANDA

2010

Summary of Results

The Afrobarometer is an independent, non-partisan research instrument that measures the social, political and economic atmosphere in Africa. Between 18 November and 6 December 2010, the Afrobarometer surveyed a nationally representative, random, stratified probability sample of 2,000 adult Ugandans. Face-to-face interviews were conducted by Wilsken Agencies, Ltd. in the language of the respondent's choice. The survey covered both urban and rural areas, as well as all four administrative regions of the country and Kampala. The sample was drawn by taking the smallest geographic units, Census Enumeration Areas (EA's) and stratifying all EA's across the country into separate lists according to administrative region and urban or rural status. 250 EA's were then randomly selected from these lists with the probability proportionate to its size in the overall population as represented in the 2002 Population and Housing Census (2010 projections). This ensures that every eligible adult had an equal and known chance of being selected. Eight households were then randomly selected within each EA, and a respondent 18 years of age or older was randomly selected from each household. A gender quota ensured that every other interview must be with a female. A sample of this size is sufficient to yield an overall margin of error of +/- 2 percent at a confidence level of 95 percent. Local language translations were done in 9 languages: Luganda, Runyankole-Rukiga, Runyoro-Rutooro, Lugbara, Alur, Luo, Ateso, Akirimojong, and Lumasaba.

We gratefully acknowledge the support of the Canadian International Development Agency (CIDA), UK Department for International Development (DfID), the Royal Danish Ministry of Foreign Affairs (RDMFA/Danida), the Swedish International Development Agency (SIDA), and the United States Agency for International Development (USAID) for Afrobarometer Round 4, and the support of the Deepening Democracy Programme (DDP) in Uganda for funding this Afrobarometer Round 4.5 survey.

Note: All figures in the following tables are percentages, rounded to whole numbers. Due to rounding, columns may not add up to exactly 100. Also note that a figure of “0” reported indicates that at least 1 response, but less than 0.5 of all responses, were in this category, whereas a dash (“-”) or blank cell indicates that there were no responses in this category. For Questions 1 through 100, weighted frequency distributions are reported.

Note: The columns in each table for “WHICH PARTY” refer to party affiliation, and are based on the responses to Questions 49 and 50 about whether the respondent is affiliated with a political party, and if so, which one.
