Afrobarometer Round 10 Survey in Seychelles

Prepared by Richard Adjadeh, August, 2025

AFROBAROMETER
Let the people have a say

Technical information form

Universe:	Citizens of Seychelles who are 18 years and older
Sample design:	Nationally representative, random, clustered, stratified, multi-stage area probability sample
Stratification:	Region and urban-rural location
Stages:	Primary sampling units (PSUs) (from strata), start points, households, respondents
PSU selection:	Probability proportionate to population size (PPPS)
Cluster size:	8 households per PSU
Household selection:	Randomly selected start points, followed by walk pattern using 5/10 interval
Respondent selection:	Gender quota filled by alternating interviews between men and women; respondents of appropriate gender listed, after which computer randomly selects individual
Weighting:	Weighted to account for individual selection probabilities
Margin of error:	+/-2 percentage points at 95% confidence level
Fieldwork by:	Infinite Consultancy Services and Institute for Development Studies, University of Nairobi
Survey languages:	English and Creole
Main researchers:	Eline Moses and Samuel Balongo
Outcome rates:	Contact rate: 89.7% Cooperation rate: 80.11% Refusal rate: 11.44% Response rate: 71.86%
Dates of fieldwork:	17 – 31 May 2025
Sample size:	1,200
Sampling frame:	2022 National Population and Housing Census produced by the NationalBureau of Statistics (NBS)
EA substitution rate:	0%

User Guide

About

Afrobarometer (AB) is a pan-African, non-partisan survey research network that conducts public attitude surveys on democracy, governance, the economy, and society. We are the world's leading source of high-quality data on what Africans are thinking.

Our vision is "A world in which Africa's development is anchored in the realities and aspirations of its people".

AB is a non-profit company limited by guarantee with headquarters in Accra, Ghana.

For more information about Afrobarometer, visit our https://www.afrobarometer.org/about/

Citation

Afrobarometer data are protected by copyright. Authors of any published work based on Afrobarometer data or papers are required to acknowledge the source, including, where applicable, citations to data sets posted on the website. Please acknowledge the copyright holders in all publications resulting from the use of Afrobarometer data by means of bibliographic citation in this form:

Afrobarometer Data, [Country(ies)], [Round(s)], [Year(s)], available at http://www.afrobarometer.org.

We also ask users to send/email copies of any publications, papers, or reports that employ Afrobarometer data to Brian Howard, Afrobarometer's head of publications, at bhoward@afrobarometer.org

Data Weights

Afrobarometer includes four weights in our datasets. Two weights are used in all country-level datasets, and an additional two weights are used in our multi-country, merge datasets for each round. The **withinwt_ea** and **withinwt_hh** weights correct for over-and under-sampling at the national level. Each respondent is assigned a weight based on the inverse of their probability of selection, accounting for factors like geographical region and urban-rural distribution. The difference between the two withinwt variables is that while withinwt_ea accounts for enumeration population size, withinwt_hh factors in enumeration population AND household size, and is not available for earlier rounds of the survey.

In each merge dataset, we have two additional weight variables, combinwt_ea and combinwt_hh. These weight variables are based on the withinwt_ea and withinwt_hh variables, but they also standardise all national samples in the merge dataset so that each country has equal weight in the continental average.

In general, a weighting variable should be used when reporting national (withinwt_ea or withinwt_hh) or cross-national (combinwt_ea or combinwt_hh) results to ensure accuracy and reliability when making generalisations or drawing conclusions at the national level or multi-country level.
For more information on Afrobarometer sampling protocols and weight construction, please visit our webpage

NOCALL Variables (Unit non-response)

In Afrobarometer surveys, interviewers record unsuccessful household calls as a "NOCALL". Reasons for unsuccessful calls may include (but are not limited to) refusals to interview by the selected respondent or household members, absence of the randomly selected respondent, or respondents not meeting the selection criteria (citizens over the age of 18 who speak one of the survey languages). These NOCALLs are recorded as variables embedded in each successful case. If interviewers have five unsuccessful calls before a successful interview, users will find that NOCALL1 to NOCALL5 contain the reasons for the unsuccessful calls before the successful interview.

Non-response coding

Afrobarometer utilises a standardised set of non-response codes across all questions and surveys. They are as follows:

- Missing=-1 (no "system missing" data or empty cells)
- Don't know= 9, 99, 999 or 9999
- Refused to answer=8, 98, 9998 or 9998
- Not Applicable=7, 97, 997 or 9997
- No Further Response/Answer=96, 996 or 9996
- Not asked in country=9994

Computed variables:

AB data sets include three computed variables that are Afrobarometer's signature indicators of Lived Poverty, Demand for Democracy, and Supply of Democracy, each of which is described below.

Lived Poverty Index (LPI):

> "As a contribution to the tracking of poverty in Africa, Afrobarometer offers the Lived Poverty Index (LPI), an experiential measure that is based on a series of survey questions about how frequently people actually go without basic necessities during the course of a year. The LPI measures a portion of the concept of poverty that is not captured well by other measures, and thus offers an important complement to official statistics on poverty and development (Mattes, 2008)"[1].

The LPI is computed both as a raw average of the frequency with which respondents go without five basic necessities (Q7A-E), and as a categorial variable that groups respondents as experiencing no, low, moderate or high lived poverty.

The following syntax is used to generate these two variables (in .sps format).

RECODE

```
        Q7A Q7B Q7C Q7D Q7E(0=0) (1=1) (2=2) (3=3) (4=4)  (ELSE=SYSMIS) INTO
        q7a_r q7b_r q7c_r q7d_r q7e_r .
VARIABLE LABELS
        q7a_r 'Go W/O Food'
        q7b_r 'Go W/O Water'
        q7c_r 'Go W/O Medical Care'
        q7d_r 'Go W/O Cooking Fuel'
        q7e_r 'Go W/O Cash Income'.
EXECUTE.

COMPUTE LivedPoverty = (q7a_r + q7b_r + q7c_r + q7d_r + q7e_r)  / 5.
VARIABLE LABELS LivedPoverty 'Lived Poverty Index (average index of 5 poverty items)'.
EXECUTE.

* Recode LPI to the categorical variable.

RECODE
  LivedPoverty
  (0=0) (0.2 thru 1.0 =1) (1.2 thru 2.0 = 2) (2.2 thru 4.0 =3) INTO
  LivedPoverty_CAT.
VARIABLE LABELS LivedPoverty_CAT 'LPI_Categorical'.
VALUE LABELS LivedPoverty_CAT 0 "No Lived Poverty" 1 "Low Lived Poverty" 2 "Moderate Lived Poverty"
 3 "High Lived Poverty".
EXECUTE.

Format LivedPoverty_CAT(F3.0).
EXECUTE.
```

Demand for Democracy (DemandDemo):

DemandDemoI' is a long-standing Afrobarometer indicator that combines explicit support for democracy (Q22) with rejection of all three non-democratic alternatives (Q21) – one-party rule, military rule, and strongman/one-man rule – using the following syntax:

```
RECODE
Q21A Q21B Q21C (5=0) (4=0) (3=0) (2=1) (1=1) (9=0) (ELSE = SYSMIS) INTO q21a_r1 q21b_r1 q21c_r1  .
VARIABLE LABELS
        q21a_r1 'reject 1 party rule, no-yes'  /
        q21b_r1 'reject military rule, no-yes' /
        q21c_r1 'reject pres dictatorship, no-yes'  .
EXECUTE.

**** compute DEMAND FOR DEMOCRACY

COMPUTE DemandDemo = (q22_r1 +  q21a_r1 +  q21b_r1 + q21c_r1 ).
VARIABLE LABELS DemandDemo 'Demand for Democracy (additive index of 4 democratic commitments:
support (1,2=0)(3=1)(else=sysmis) + reject (5,4,3,9=0)(2,1=1)(else=sysmis)' .
VALUE LABELS  DemandDemo 0 "No demand for democracy" 1 "Agrees w/ 1 of 4 components" 2 "Agrees w/ 2
of 4 components"
3 "Agrees w/ 3 of 4 components" 4 "Full demand for democracy".
EXECUTE .
```

Supply of Democracy (SupplyDemo):

SupplyDemo combines the indicators of perceived extent of democracy (Q32) and satisfaction with the way democracy works (Q33) to provide a single indicator of the extent to which governments are supplying democracy to their citizens. The syntax is as follows:

```
RECODE
 Q32 (1=0) (2=0) (9=0) (8=0) (3=1) (4=1) (ELSE=SYSMIS) INTO q32_r1.
VARIABLE LABELS q32_r1 'how democratic is govt recoded, 0-1, dk=0'.
EXECUTE.

RECODE
 Q33 (0=0) (1=0) (2=0) (9=0) (3=1) (4=1) (ELSE=SYSMIS) INTO q33_r1.
VARIABLE LABELS q33_r1 'satisfaction with democracy recoded, 0-1)'.
EXECUTE.

COMPUTE SupplyDemo = (q32_r1 + q33_r1).
 VARIABLE LABELS SupplyDemo 'Supply of Democracy (additive index of 2 items: satisfaction
(0,1,2,9=0)(3,4=1)(else=sysmis) + extent (1,2,8,9=0)(3,4=1)(else=sysmis)'.
VALUE LABELS  SupplyDemo 0 "Perceives no supply" 1 "Perceives supply of one, not both" 2 "Perceives full
supply of democracy (Extent +Satisfaction)".
EXECUTE.

Format  SupplyDemo  (F3.0).
EXECUTE.
```

Limitations of Afrobarometer Data

Afrobarometer uses national probability sampling designed to generate a sample that is a representative cross-section of all citizens aged 18 and above. Samples usually include either 1,200 or 2,400 cases. A randomly selected sample of n=1,200 cases allows inferences to national adult populations with a margin of sampling error of +/-2.8 percentage points with a confidence level of 95%. With a sample size of n=2,400, the margin of error decreases to +/-2.0 percentage points at a 95% confidence level. The margins of error will increase for sub-national groups (regions, demographic groups, etc.). While efforts are made to minimize nonresponse, some biases may exist if certain groups are underrepresented in the final sample.

	9998	Refused to answer	3
	9999	Don’t know	10

Q72Other

	Value	Count
Label	Q72other. Most important reason for emigrating (verbatim)	
Type	String	
Measurement	Nominal	
		1200

Q73A

	Value	Count
Label	Q73a. Economic impact of foreign migrants	
Type	Numeric	
Measurement	Ordinal	
	-1 Missing	0
	0 Very bad	220

1	Fairly bad	301
2	Neither good nor bad	233
3	Fairly good	376
4	Very good	33
8	Refused to answer	1
9	Don’t know	36

Q73B

	Value	Count
Label	Q73b. Admit more or fewer job seekers	
Type	Numeric	
Measurement	Ordinal	
-1	Missing	0
0	No job seekers at all	184
1	Fewer job seekers	662
2	About the same	276
3	More job seekers	54
8	Refused to answer	2
9	Don’t know	23

Q73C

	Value	Count
Label	Q73c. Admit more or fewer refugees	
Type	Numeric	
Measurement	Ordinal	
-1	Missing	0
0	No refugees at all	738
1	Fewer refugees	351

	2	About the same	64
	3	More refugees	5
	8	Refused to answer	1
	9	Don’t know	40

Q73D

	Value		Count
Label		Q73d. Difficulty to move across borders	
Type		Numeric	
Measurement		Ordinal	
	-1	Missing	0
	1	Very difficult	279
	2	Difficult	417
	3	Easy	154
	4	Very easy	83
	8	Refused to answer	2
	9	Don’t know/Haven’t heard enough to say	264

Q74

	Value		Count
Label		Q74. Awareness of AfCFTA	
Type		Numeric	
Measurement		Ordinal	
	-1	Missing	0
	0	No	880
	1	Yes	240

	8	Refused to answer	1
	9	Don't know	79

Q75

	Value		Count
Label		Q75. Preferred trading partners	
Type		Numeric	
Measurement		Nominal	
	-1	Missing	0
	0	None of the above, don’t want open trade	16
	1	Regional countries only	32
	2	All African countries	130
	3	All countries globally	864
	4	Some other answer	30
	8	Refused to answer	3
	9	Don’t know	125

Q76A

	Value		Count
Label		Q76a. Promoting trade vs protecting local producers	
Type		Numeric	
Measurement		Ordinal	
	-1	Missing	0
	2	Agree with 1	563
	3	Agree with 2	471
	5	Agree with neither	94
	8	Refused to answer	0
	9	Don’t know	72

Q76B

	Value	Count
Label	Q76b. Allow free movement in region vs limit cross-border movement	
Type	Numeric	
Measurement	Ordinal	
-1	Missing	0
2	Agree with 1	562
3	Agree with 2	455
5	Agree with neither	88
8	Refused to answer	0
9	Don’t know	96

Q77A_SEY

	Value	Count
Label	Q77a-sey. Trust in police to combat drug abuse	
Type	Numeric	
Measurement	Ordinal
